

FOLDING CONTAINER HOMES

PRODUCT SPECIFICATIONS

A+ FIRE RATING

Length: 19 ft (5.8 m) **Width:** 8 ft (2.5 m) **Height:** 8 ft (2.5 m)

Grade A Fire Resistance

Universal Wall Systems' Folding Container Homes have a Grade A fire rating.

• Earthquake & Wind Rating

Earthquake: Magnitude 10
Beaufort Scale: Grade 10
Anti-Mold & Moisture Rating

All material used on the Folding Container Home is anti-mold. The wall panel and roof are 100% waterproof and moisture-proof. The section bar of the structure is formed integrally by high frequency welding and the joint locations are occlusal design. These containers have a high-performance seal, windbreak, and are rainproof.

Optimum Sound & Vibration Dampening

Universal Wall Systems' Folding Container Homes have a 45 dB sound rating.

Strength Rating

• Roof Load Bearing: >10.22 lb/ft² (>50 kg/m²)

Ground Load Bearing: >30.72 lb/ft² (>150 kg/m²)

• Lateral Pressure of the Wall: >16.38 lb/ft² (>80 kg/m²)

FOLDING CONTAINER HOUSE TECHNICAL PARAMETER								
No.	Item	Value	No.	Item	Value			
1	Roof Load	10.24 lb/ft2	9	Wall Deformation	61.44 lb/ft2			
2	Flooring Load	30.72 lb/ft2	10	Seismic Grade	10 magnitude			
3	Aisle Load	40.96 lb/ft2	11	Wind Loading	11 level of wind loading			
4	Wall Side Stress	16.38 lb/ft2	12	Interior Height	7.87 ft			
5	Fireproof	A grade		229				

ADDITIONAL FEATURES & ADVANTAGES

The whole frame profile is formed by a high frequency welding machine, and all splicing points are designed with upper and lower bite, with excellent sealing. It is windproof and rainproof. The profile base steel is 2.5mm galvanized steel and the height of the steel base is 27cm. The column steel is 16cm and the profile of roof beam is 19cm. The frame contains the base line and the folded height is 40cm.

ADVANTAGES

Our folding container house can be conveniently transported and stored. It has a solid base, is corrosion resistant, has a stable structure, a buckle groove design with seamless splicing. The house seals are strong, safe and efficient. The steel elements are large and wide. The house can be repeatedly folded and reused. The life expectancy is more than 15 years.

Excellent quality and environmental protection.

- 1. Flexible combination can be used in a single box, can be combined into an open large space, and can be superimposed to 3 layers.
- 2. Fully equipped can be used with different shapes of roofs, corridors, canopies, stairs, and can be decorated according to customer needs.
- 3. Fast installation an average of 4 workers can set-up a single container house installation in about 3 hours, or it can be moved and relocated after assembly, which is convenient and quick.
- 4. Safe and durable the service life is more than 15 years, the seismic intensity is 8 degrees, and the wind resistance is 11 levels.
- 5. One 40 foot shipping container can load 10 sets.
- 6.100% fire proof and water proof.
- 7. Save on transportation, installation & storage costs.
